Doorset handings in plan view

Special doorsets are constructed in steel, either primed or finish coated to BS/RAL colours, or in stainless steel with:

- many different vision panels or louvres
- T lug or second fix options as standard
- factory welded or site assembly frames

It is the decades of Fitzpatrick design and manufacturing expertise that help to minimise site installation time and optimise a professional completion of projects large and small.

If you require full architectural information, fire test reports or assessment data please contact our technical helpline.

Special Doorsets

Soundcel high quality doorsets are designed to reduce noise in buildings (see Sound Reduction Index graph above) and are supplied with:

- 1.6mm zinc coated double rebated frames
- acoustic compression seals
- stainless steel hinges
- preparation for locks or panic furniture from our extensive range
- accurate structural reinforcement to receive fixing screws
- 1.2mm zinc coated steel door skin
- acoustic core

Citadel Stainless doorsets are constructed from stainless steel for hygiene or aesthetic requirements. Fitzpatrick has decades of expertise in the manufacture and construction of special stainless steel doorsets and frames.

Citadel Special doorsets

are installed throughout the world. Many door manufacturers turn to Fitzpatrick when they have a requirement for oversized doors, special doors and unusual configurations. Call our Sales office for more information.
